

WHAT IS CLAIMED IS:

1. A method of generating a document management system, the method comprising:
  - importing one or more documents in electronic form;
  - designating an organizational structure including main categories and one or more levels of subcategories;
  - assigning the one or more documents to one or more of the main categories and subcategories within the organizational structure; and
  - automatically generating a document management system including the one or more documents organized within the organizational structure and accessible via a computing system.
2. The method of Claim 1, wherein the step of importing further comprises modifying properties of the one or more documents.
3. The method of Claim 2, wherein one of the properties comprises a name.
4. The method of Claim 2, wherein one of the properties comprises a digital format of the electronic form and wherein the modification includes format standardization.
5. The method of Claim 1, wherein the step of importing comprises importing from a third party vendor.
6. The method of Claim 5, wherein the third party vendor comprises a scanning company.
7. The method of Claim 1, wherein the document management system comprises a website and is accessible via the Internet.
8. The method of Claim 1, wherein the management system comprises a CD-ROM and is accessible via a computer.
9. The method of Claim 1, wherein the document management system comprises computer readable storage media.
10. The method of Claim 1, wherein the one or more documents comprise forms associated with a specific industry.

11. The method of Claim 10, wherein the industry comprises the health care industry.

12. The method of Claim 10, wherein the forms are associated with one or more health care programs.

13. The method of Claim 1 further comprising assigning one of a plurality of standard document sizes to the one or more documents, wherein an actual document size may not be identically equal to any of the plurality of standard document sizes.

14. A method of automatically generating organized computer readable electronic information, the method comprising:

associating electronic documents within an organization structure designated by a user, wherein the organizational structure includes main categories and one or more levels of subcategories;

automatically generating a website indexing the electronic documents within the organization structure;

modifying one of the electronic documents using a user interface; and

automatically updating the website to reflect the modified electronic document.

15. The method of Claim 14, wherein the automatic update is transparent to the user.
